

PIP

SELECTING
THE RIGHT GLOVE
FOR THE JOB

SELECTOR GUIDE

ONE GLOVE DOESN'T FIT ALL CHOOSING THE RIGHT HAND PROTECTION

As a safety manager, you're responsible for keeping workers protected while balancing cost, performance, and real-world job site demands. Everyone wants the best gloves, but the reality is that not every job or budget allows for a one-size-fits-all solution. Some tasks are too abrasive, too dirty, or require frequent glove changeouts, where durability takes a backseat to cost efficiency. Other jobs demand long-lasting comfort, dexterity, and grip, making performance a priority. And sometimes purchasing pressure is exclusively driven by upfront cost rather than long-term value.

That's why PIP® offers a smart lineup of nitrile foam gloves so you can choose the right glove for the right job.

Premium Performance
Maximum durability, comfort, and breathability for long-term wear and lowest cost of use.

Balanced Solutions
Cost-conscious options that maintain strong performance and worker comfort.

Price-Driven Choices
Budget-friendly gloves for high-turnover applications.

By providing the right options, we ensure safety, productivity, and cost efficiency so you don't have to compromise. Let's find the best solution for your team.
