SELECTOR GUIDE

THE SAFETY HELMET EVOLUTION

Traditional hard hats have remained largely the same for over 80 years, but job site risks have increased. Modern safety helmets now provide enhanced protection, addressing low-height impacts and falls. They feature a lower-profile fit for better comfort and visibility, integrated side-impact protection, and secure chin straps for dynamic environments. With accessory compatibility, they boost productivity without sacrificing safety. It's time to upgrade from outdated head protection to advanced safety helmets for improved worker safety.

ADVANCED IMPACT PROTECTION

Traverse™—Mips®

280-HP1491RM

280-HP1491RVM *Vented*

- Super lightweight ABS shell
- MIPS®—Multi-Direction Impact Protection
- EPS foam lateral impact protection
- ANSI Type II; Class E or C Tested to mandatory EN 12492 shock and penetration requirements

AVAILABLE COLORS

Mips® Brain Protection System

A LOW FRICTION LAYER DESIGNED TO HELP REDUCE THE SEVERITY OF HEAD INJURIES

THE HARD HAT EVOLUTION

Type II hard hats are revolutionizing job site safety, offering 360-degree protection from both top and side impacts unlike traditional Type I hats. Enhanced stability, better fit, and optional chin straps keep them secure during high-movement tasks. With accessory compatibility, they improve both safety and productivity. As job site risks increase, upgrading to Type II hard hats is essential for modern protection.

FULL COVERAGE / BETTER PROTECTION

Kilimanjaro™

280-HP642R
280-HP642RV *Vented*

- Sleek and attractive HDPE shell
- Wheel ratchet size adjustment
- 4-point suspension system
