STRONGER GRIP. REDUCED STRAIN. VERSATILE PROTECTION.

PosiGrip MAX™ is an advanced bi-polymer coating applied to select G-Tek® coated seamless knit work gloves to deliver superior grip in both dry and oily conditions. Its unique ultra-thin yet durable polymer composition ensures precise handling and resilience in tough conditions.

Unlike conventional coatings that may allow permeation to the skin, PosiGrip MAX™ keeps hands dry when working with oils—reducing the chances of skin contamination and chageout rates.

35% LESS FORCE REQUIRED

When tested against conventional foam nitrile coatings, PosiGrip MAX™ required an average of 35% less gripping force on dry and oily surfaces- a clear advantage when grip is your first line of defense.

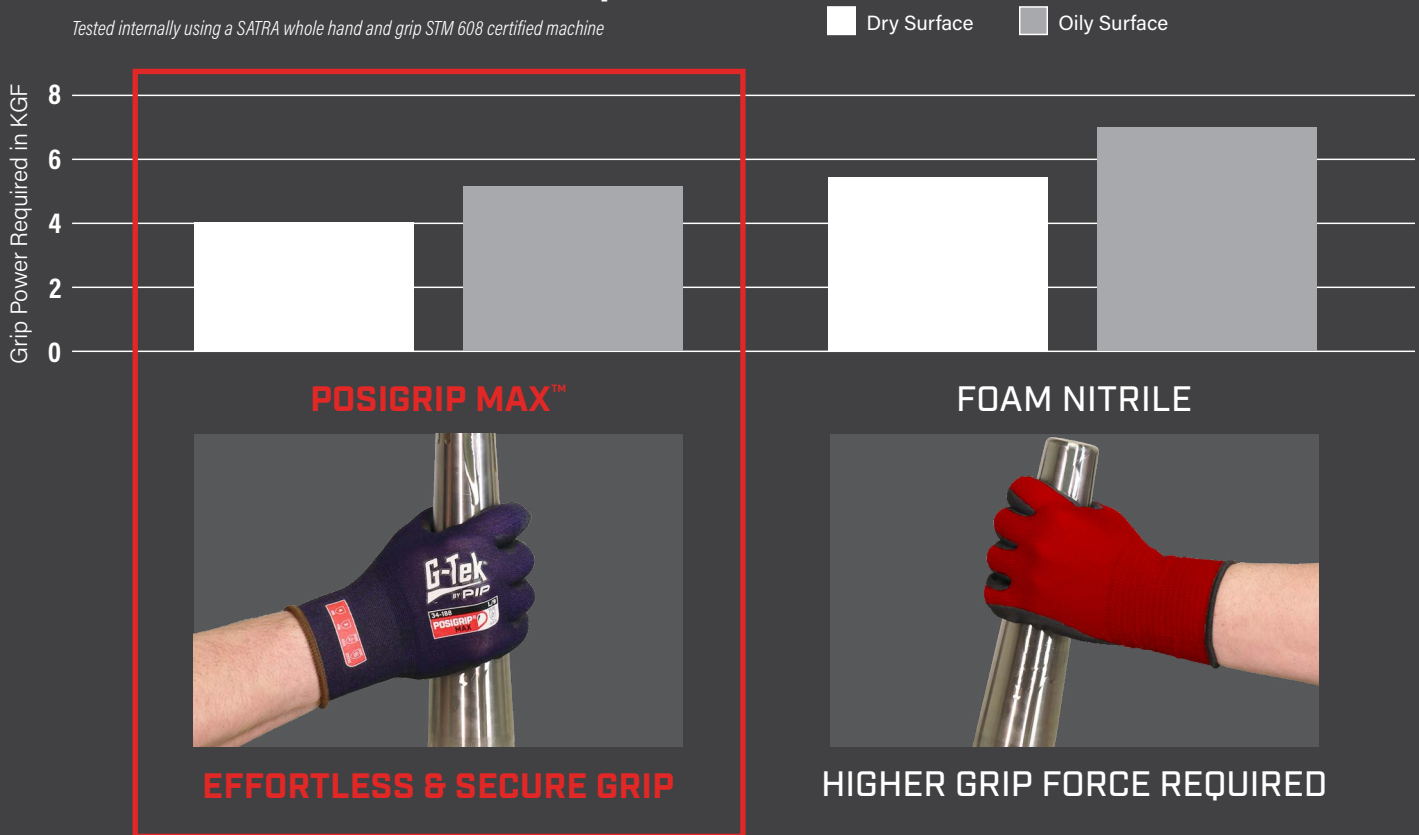

POSIGRIP MAX™ REDUCES THE RISKS.

- Lower risk of cuts and lacerations from grip failure
- Lower risk of ergonomic injuries from overexertion
- Lower risk of skin reactions from contact with oil

GRIP TESTING

AVERAGE CATCH/PULL FORCE REQUIRED

Tested internally using a SATRA whole hand and grip STM 608 certified machine

ABRASION RESISTANCE UP TO 7,000 CYCLES

PosiGrip MAX™ remains durable up to nearly 7,000 ANSI/ISEA 105 abrasion cycles, resulting in a longer product lifespan.
