PRODUCT DESCRIPTION

E-FLARE™ WARNING BEACONS

Our E-flare™ line of products is not just innovative, they're life savers. They've progressed technology from a torch, to light beacons that use multi-color and sequencing of light that can be seen for over ¾ of a mile away without the night vision, point fixation and distance judgement problems associated with strobe and incandescent lights.

APPLICATIONS

- Personal Visual Protection
- Location Alert
- Traffic Management
- Accident or Hazardous Scene Alert
- Helicopter Landing Zone Demarkation
- Unusual Hazards
- Obstacle Identification
- Vehicle Breakdowns
- Emergency Landing Strip

PERFORMANCE

BE SEEN AND SAFE IN ALMOST ANY SITUATION

Intensely Bright – Patented fresnel lens and high-luminosity LEDs allow beam to be visible for ¾ mile without the night vision, point fixation, and distance judgment problems associated with strobe and incandescent lights. The florescent body color and reflective strip allow for maximum unit visibility.

Lightweight and Simple to Use – Beacons now weigh under 2/3 lb. with 4 “AA” batteries installed. An improved switching mechanism involves a simple twist of the lens to the desired function. Place unit(s) to create a highly visible warning and safety zone for people, work areas, hazards and accidents.

Durable – The impact resistant ABS body and shatterproof polycarbonate lens will survive a 3-foot drop onto a concrete surface, and are both waterproof (up to 100 feet) and dustproof.

Double the Safety – Beacons provide safety by ensuring maximum 360° visibility, but, unlike pyrotechnic flares, there is no risk of fire or explosion, and no toxic fumes or residue.

Infinitely Versatile – High-strength clips with added holes for versatility of attachment to belts, clothing, vehicles, traffic cones or signs.

HAZMAT accredited for use in Class 1, Division 2 / Zone 2 hazardous areas.
