G-Tek[®]
NEOFOAM[®]

The best secure grip for handling items

GLOVES SHOULDN'T ONLY PROTECT THE HAND
THEY NEED TO MAKE THE JOB EASIER

Reintroducing G-Tek® NeoFoam® gloves, designed with the best secure grip for handling items. NeoFoam's innovative coating technology was created exclusively for PIP® as a work glove designed to **REDUCE SLIP - EFFORT - FATIGUE** when handling boxes or materials.

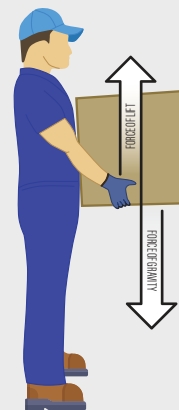

Increase surface energy and friction

NeoFoam® is PIP's proprietary copolymer-based coating developed for optimal work performance. NeoFoam® is an exceptionally flexible coating that is applied more thinly than nitrile and latex. It's flexibility allows it to conform in a skin-like way to the liner and hand – making it exceptionally comfortable and dexterous for all types of material handling.

When magnified, the NeoFoam® coating's surface is comprised of tiny cell structures that help to dramatically improve grip.

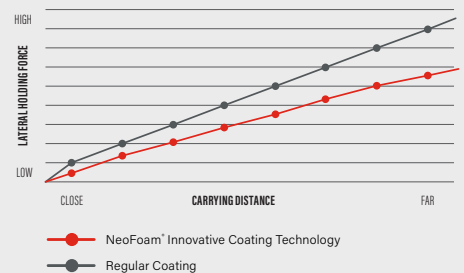

Reduce slip – effort – fatigue

Smooth corrugated cardboard boxes with low surface energy, or friction, can be slippery. Heavier boxes or packages require more effort to hold on – especially with bare hands. Increasing that surface friction with PIP's G-Tek® NeoFoam® gloves help maintain a secure grip and reduces the amount of holding pressure.

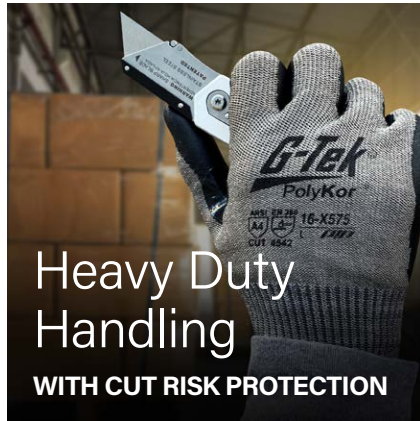

USE UP TO 20% LESS LATERAL HOLDING FORCE

When carrying boxes with gloves that have NeoFoam® innovative coating technology

General Handling
OF BOXES AND PACKAGES

Heavy Duty Handling
WITH CUT RISK PROTECTION

Cold & Wet Handling
INSULATED PROTECTION

34-600

- Lightweight liner for tasks that require a high degree of dexterity
- Thin flexible coating ideal for sorting and inspection

34-605

- Double strand liner for tasks that require added strength and abrasion resistance
- Thin flexible coating ideal for small parts handling and light assembly

ANSI
A2

16-320

- Lightweight coating and liner provides dexterity and tactile sensitivity
- Form and fit provide bare hand-like dexterity

ANSI
A3

16-368

- Lightweight coating and liner provides dexterity and tactile sensitivity
- Highly versatile glove with the reinforced wear points, good for a variety of handling applications

ANSI
A4

16-X570

- Highly durable cut resistant fiber
- Ideal for heavy and general duty applications

41-1420

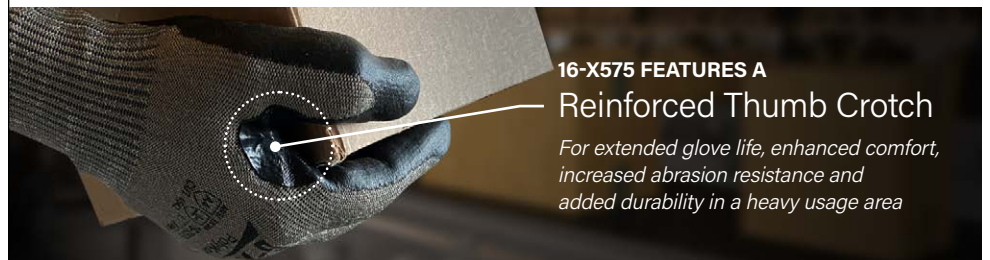

- Terry liner provides excellent thermal insulation
- Ideal for transportation and snow clearing applications where visibility is required

ANSI
A3

41-1415

- Hi-vis wrist for added visibility in poor conditions
- Double-dipped full hand coating provides liquid protection

16-X575 FEATURES A Reinforced Thumb Crotch

For extended glove life, enhanced comfort, increased abrasion resistance and added durability in a heavy usage area
