JSP[®]

GETTING WORKERS TO WEAR HEAD PROTECTION CAN BE TOUGH, ESPECIALLY IN AREAS WHERE HARD HATS ARE NOT REQUIRED

It's estimated that a third of all impact injuries to the head are suffered by workers who bumped into stationary objects like low hanging obstructions while not wearing any head protection.* The sleek styling of our JSP® bump caps helps to increase wearer acceptability and reduce injuries.

FULL BRIM RANGER A1+™ BUMP CAP

Designed for use outdoors. Features a 3" full brim to protect your face, neck, and ears from the sun's rays, ventilation to help keep you cool and comfortable, and an adjustable chin strap for a secure fit.

KEY BENEFITS

ALL AROUND PROTECTION
The HDPE liner provides protection from front-to-back and side-to-side.

VENTILATION
Holes in the liner match up with mesh panels on the cap to provide added ventilation for coolness and comfort.

UNIQUE SIZE ADJUSTER
Allows for a quick, easy, and secure fit that won't fall off your head.

REFLECTIVE PIPING
Reflective piping adds extra visibility and therefore safety in all working environments.

HAVE YOU HEARD ABOUT THE NEW ANSI/ISEA 100-2024 STANDARD FOR BUMP CAPS?

It's a voluntary standard that establishes the minimum performance, testing and labeling criteria for industrial bump caps and inserts, to help protect workers from minor head injuries.

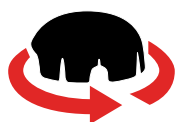

- Level 1 consists of testing to a force transmission equivalent to 7.5 J at a single point on the front and the back of the crown
- Level 2 consists of testing to a force transmission equivalent to 12.5 J at two points on the front and the back of the crown
