SITE BOSS[™] EYEWEAR

60% MORE COVERAGE. 100% MORE CONFIDENCE.

PROTECTION FOR THOSE WHO **LEAD THE WAY**

Engineered for workers who won't compromise on protection or performance, Bouton® Site Boss™ combines bold style with serious function. Featuring 60% larger lenses than standard eyewear, these ANSI Z87.1+ certified designs offer superior coverage, enhanced visibility and advanced glare-reducing lens technologies, including Mirror Plus PRO™ and PRO Polarized™.

Available with our innovative FogLess® 3Sixty™ technology, Site Boss™ ensures crystal-clear vision even in the most demanding environments. Lightweight frame options and ultra-flexible AirFlex™ temples integrate seamlessly with head protection, giving you the confidence to lead, on the jobsite and beyond.

BUILT TO TACKLE THE JOBSITE LIKE A BOSS

60% LARGER LENSES
THAN STANDARD EYEWEAR

AIRFLEX™ TEMPLES
PROVIDE A SECURE GRIP
EVEN ON LARGER HEAD SIZES

**ADJUSTABLE SOFT
RUBBER NOSE PADS**
PROVIDE AN ERGONOMIC
FIT FOR ALL-DAY COMFORT

FEATURING **BOUTON® LENS TECHNOLOGIES**

The Mirror Plus™ coating on the face of the lens deflects sunlight from the wearer's eyes, delivering noticeably less glare and reflection than standard gray lenses. Another coating on the back of the lens significantly reduces light reflecting into the eye, for enhanced comfort and performance.

Mirror Plus PRO™ lens coatings take traditional Mirror Plus™ and further enhance visibility by deflecting an increased amount of sunlight, and helping to reduce glare by up to 15% more than a traditional tinted lens.

Our unique Mirror Plus PRO Polarized™ lens coating filters scattered sunlight from smooth surfaces, like water and snow, by controlling the angle at which light enters the lens. The result is incredibly enhanced acuity and significantly higher contrast.

When a rapid temperature change occurs, micro-water droplets in the air will collect on untreated lenses, causing them to fog and impede vision. Bouton's innovative FogLess® 3Sixty™ technology applies a densely bonded hydrophobic lens coating that continues to bead away water and moisture, even after repeated cleaning.
