

APRON-1

Powerful Cut Protection, Top to Bottom

APPLICATIONS

Glass Manufacturing
Glass Handling
Metal Fabrication
Sharp Metal Handling

Here's non-stop cut protection from the breastbone to the knees, especially important when working with glass and sheet metal. Worldwide's Apron-1 is made up of an extra thick layer of high performance cut resistant knit, featuring ATA® fiber technology. As a result, it delivers significant ANSI level A6 resistance to cuts and slashes. Yet it's surprisingly flexible and easy to move around in. Adjustable straps at the neck and waist let the wearer customize the fit for maximum comfort. The dark color and easy machine washability helps this protective garment last for extended periods of use. And it's made in the USA.

FEATURES

- Made from extremely strong engineered fiber
- Significant ANSI A6 cut protection throughout
- Adjustable straps customize the fit at the top and in the waist
- Dark color hides dirt and soiling
- Machine wash in cold water, dry on low heat

ATTRIBUTES
